

Moving Up 1 extra

Exercise 1 (Reading skill: Main Idea)

For **main idea**, students should be able to identify the most important idea or message of the text.

Two Sides of the Same Story

When we read something online, we often think we are getting the complete story. However, two people can describe the same event in very different ways. They may choose different facts to include or use different words to describe what happened. This does not always mean that one person is lying. Sometimes, people simply see the same situation from different points of view.

Imagine that a school holds a music festival. One student writes, “The festival was a great success. Hundreds of students came and enjoyed the performances.” Another student writes, “The festival was too crowded, and many people had to wait a long time to buy food.” Both students attended the same event, but they focused on different experiences.

This is why good readers should not depend on only one source. When possible, they should compare information from different places and look for facts that appear in more than one source. They should also notice whether a writer is sharing a fact or a personal opinion. Asking questions can help readers understand a story more clearly.

Critical reading does not mean that we should believe nothing. Instead, it means that we should think carefully before deciding what to believe. By looking at different points of view and checking the information, we can develop a more complete understanding of a situation.

Comprehension — Main Idea

1. What is the main idea of the passage?

- A. Different people may describe the same situation differently.
- B. School festivals are usually too crowded.
- C. People should not trust anything they read online.

2. Why does the writer give the example of the music festival?

- A. To show how to organize a successful event
- B. To explain how different viewpoints can change a story
- C. To show that students enjoy music festivals

3. What is the main idea of the third paragraph?

- A. Readers should compare different sources and check information.

- B. Personal opinions are more important than facts.
- C. Readers should always trust the first source they find.

4. What does the writer want readers to learn about critical reading?

- A. We should find mistakes in every text we read.
- B. We should avoid reading other people's opinions.
- C. **We should think carefully before deciding what to believe.**

5. Which title best expresses the main idea of the passage?

- A. A Successful School Festival
- B. **Looking at More Than One Side**
- C. Why People Disagree

Word Bank: compare • evidence • opinion • source • viewpoint

1. Before believing a story, check if the _____ is reliable. **(source)**
2. Good readers _____ information from different places. **(compare)**
3. A writer should provide _____ to support a claim. **(evidence)**
4. An _____ expresses what someone thinks or feels about something. **(opinion)**
5. People can have a different _____ about the same event. **(viewpoint)**

1. the same event /People / in different ways /may understand

People may understand the same event in different ways.

2. Personal experience /people/ how/ can effect/ tell a story

Personal experiences can affect how people tell a story.

3. can give /Reading /a clearer picture/ different sources / you

Reading different sources can give you a clearer picture.

4. personal opinions /can separate/ from /facts/ Good readers

Good readers can separate facts from personal opinions.

5. more clearly/ helps us/ understand /Asking questions /information

Asking questions helps us understand information more clearly.

Exercise 2 (Reading skill: Facts and details)

For **facts and details**, students should be able to find specific facts and details that are directly stated in the text.

What Does “Healthy” Really Mean?

When people buy food or drinks, they often look at the words on the front of the package. Some products use phrases such as “natural,” “low fat,” or “high in protein.” These words can make a product sound healthy. However, they do not always tell the whole story about what is inside the package.

For example, a breakfast drink may say that it contains vitamins and real fruit. However, it may also contain a large amount of sugar. A snack marked “low fat” may still have a lot of salt or sugar. This does not mean that these products are always unhealthy, but shoppers should look at more than the large words on the front.

One useful habit is to read the nutrition information and ingredient list. The ingredient list shows what was used to make the product, while the nutrition information tells you about things such as sugar, fat, and protein. Comparing two similar products can also help shoppers understand the differences between them.

Food packages are designed to attract attention and encourage people to buy products. Therefore, careful shoppers should not make decisions based only on attractive pictures or simple claims. Reading the details can help them make choices based on better information.

Comprehension — Facts & Details

1. What words may appear on the front of food packages?

- A. **Natural, low fat, or high in protein**
- B. Expensive, cheap, or popular
- C. Fresh, delicious, or homemade

2. What may a breakfast drink contain besides vitamins and fruit?

- A. **A large amount of sugar**
- B. Too much protein
- C. No ingredients at all

3. What does an ingredient list show?

- A. Where the product is sold
- B. **What was used to make the product**
- C. How popular the product is

4. Why is it useful to compare two similar products?

- A. To find the most attractive package
- B. **To understand the differences between them**
- C. To decide which company is more famous

5. According to the passage, what should shoppers do before making a choice?

- A. Choose products with colorful packages
- B. Believe the words on the front of the package
- C. **Read the details about the product**

Word Bank: ingredients • compare • package • nutrition • attract

1. Food companies design their products to _____ customers' attention. **(attract)**
2. The _____ list tells us what is used to make a food product. **(ingredients)**
3. Shoppers should _____ similar products before making a choice. **(compare)**
4. The _____ information shows the amount of sugar, fat, and protein. **(nutrition)**
5. Words on the front of a _____ may not tell the whole story. **(package)**

1. can help / make / Reading food label /you / better choices

Reading food labels can help you make better choices.

2. that looks healthy / A product /may still contain /sugar / a lot of

A product that looks healthy may still contain a lot of sugar.

3. should check /before/ the ingredients/ Shoppers/ buying a product

Shoppers should check the ingredients before buying a product.

4. a food product/ Nutrition information / useful details /about /provides

Nutrition information provides useful details about a food product.

5. can influence/ decide to buy /Colorful packaging/ what people

Colorful packaging can influence what people decide to buy.

Exercise 3 (Reading skill: Sequence of events)

*For **sequences of events**, student should be able to identify the order in which events or steps happen.*

What Happens to a Plastic Bottle After Recycling?

Many people put empty plastic bottles into recycling bins, but what happens to them next? Recycling a plastic bottle involves several steps before the material can be used again. The process begins when recycling trucks collect bottles and other recyclable waste from homes, schools, and public places.

First, the waste is taken to a recycling center, where different materials are separated. Plastic bottles are sorted by type and color. Next, the bottles are cleaned to remove labels, dirt, and leftover liquid. After they are clean, machines cut the bottles into many small plastic pieces called flakes.

The plastic flakes are then washed again and dried. After that, they are heated until they melt. The melted plastic is formed into small pieces called pellets. These pellets can be sent to factories and used as material for making new products.

Finally, the recycled plastic may become new bottles, clothing, bags, or other useful items. Recycling does not completely solve the problem of plastic waste, but it can reduce the amount of new plastic that needs to be produced. Understanding this process also shows why correctly sorting waste is important.

Comprehension — Sequence of Events

1. What happens first after plastic waste arrives at a recycling center?

- A. It is melted.
- B. **Different materials are separated.**
- C. It is made into new bottles.

2. What happens after the plastic bottles are sorted?

- A. **They are cleaned.**
- B. They are sent to shops.
- C. They are heated.

3. When are plastic bottles cut into small flakes?

- A. Before they are collected

- B. After they are cleaned
- C. After they become pellets

4. What happens after the plastic flakes are washed and dried?

- A. They are thrown away.
- B. They are mixed with paper.
- C. They are heated and melted.

5. Which sequence is correct?

- A. Sort → Clean → Cut → Melt → Make pellets
- B. Clean → Melt → Sort → Cut → Make pellets
- C. Sort → Melt → Clean → Make pellets → Cut

Word Bank: collect · separated · flakes · melted · pellets

1. Recycling trucks _____ plastic bottles from different places. **(collect)**
2. At the recycling center, different materials are _____ from each other. **(separated)**
3. Machines cut clean plastic bottles into small pieces called _____. **(flakes)**
4. The plastic is heated until it is completely _____. **(melted)**
5. The melted plastic is formed into small pieces called _____. **(pellets)**

1. Recycling / plastic waste / helps reduce /in the environment

Recycling helps reduce plastic waste in the environment.

2. recycling centers / are separated / Different types of waste /at

Different types of waste are separated at recycling centers.

3. new products/ can be used / Recycled materials /to create

Recycled materials can be used to create new products.

4. can harm/ Plastic waste / the environment/ animals and

Plastic waste can harm animals and the environment.

5. to produce /Recycling / the need / new plastic/ can reduce

Recycling can reduce the need to produce new plastic.

Exercise 4 (Reading skill: Cause and effect)

*For **cause and effect**, students should be able to identify what causes something to happen and what happens as a result.*

What Happens When Arctic Ice Melts?

The Arctic is the region around the North Pole. Much of the Arctic Ocean is covered by sea ice, especially during the winter. However, as the Earth becomes warmer, more of this ice melts during the summer. Higher temperatures also make it more difficult for the ice to grow back during the colder months.

Melting ice can affect animals that live in the Arctic. Polar bears, for example, use sea ice to travel and hunt for food. When there is less ice, they may need to travel farther to find food. Other animals, such as seals, also depend on sea ice for resting and raising their young.

The loss of Arctic ice can also affect the Earth's temperature. Ice has a bright surface that reflects sunlight back into space. Dark ocean water absorbs more heat. Therefore, when ice disappears, the ocean absorbs more energy from the sun. This can cause the Arctic to become even warmer and lead to more melting.

Changes in the Arctic can have effects beyond the North Pole. Scientists continue to study how these changes may influence weather, oceans, and ecosystems around the world. Reducing greenhouse gas emissions can help slow global warming and protect the Arctic environment.

Comprehension — Cause & Effect

1. Why is more Arctic ice melting during summer?

- A. Animals are breaking the ice.
- B. **The Earth is becoming warmer.**
- C. The ocean is becoming smaller.

2. What can happen when there is less sea ice for polar bears?

- A. They spend more time in trees.
- B. They can find food more easily.
- C. **They may need to travel farther for food.**

3. Why does the ocean absorb more heat when sea ice disappears?

- A. Dark ocean water absorbs more energy from sunlight.
- B. Sea animals produce more heat.
- C. The ocean becomes shallower.

4. What can happen when the ocean absorbs more heat?

- A. More sea ice forms immediately.
- B. The Arctic becomes darker and colder.
- C. The Arctic may become even warmer.

5. Which cause-and-effect relationship is correct?

- A. Less sea ice → lower ocean temperatures
- B. Higher temperatures → more Arctic ice melts
- C. More greenhouse gases → more sea ice forms

Word Bank: absorbs · melting · reflects · temperatures · protect

1. Higher _____ can cause more Arctic ice to melt. **(temperatures)**
2. The bright surface of ice _____ sunlight back into space. **(reflects)**
3. Dark ocean water _____ more heat from the sun. **(absorbs)**
4. Warmer conditions can lead to more ice _____ in the Arctic. **(melting)**
5. Reducing greenhouse gas emissions can help _____ the Arctic environment. **(protect)**

1. cause /to disappear /Rising temperature/ Arctic ice/ more rapidly

Rising temperatures cause Arctic ice to disappear more rapidly.

2. the survival of/ The loss of/ can affect/ sea ice / Arctic animals

The loss of sea ice can affect the survival of Arctic animals.

3. absorbs / from the Sun / Dark ocean water / more energy

Dark ocean water absorbs more energy from the sun.

4. can increase /the speed of / Warmer oceans /ice melting

Warmer oceans can increase the speed of ice melting.

5. depend on /Many Arctic animals / cold /to survive / environment

Many Arctic animals depend on cold environments to survive.

Exercise 5 (Reading skill: Compare and contrast)

For **Compare and contrast**, students should look at the information and identify how the two things are similar or different.

City Life and Country Life

Living in a city and living in the countryside can offer very different experiences. Cities are usually crowded and busy, with large populations, tall buildings, and many forms of public transportation. In contrast, the countryside generally has fewer people, more open spaces, and a quieter environment. Both places can be enjoyable, but they suit different lifestyles.

One advantage of city life is convenience. People often live close to schools, hospitals, shops, and entertainment. Public transportation can also make travelling easier. However, cities may have heavy traffic, noise, and air pollution. The countryside is usually more peaceful and has greater access to nature, but people may need to travel farther to reach important services.

Despite these differences, city and country life also have some similarities. People in both places need places to work, study, shop, and spend their free time. Communities can also be strong in both environments. While city residents may meet many different people, those in smaller communities may develop closer relationships with their neighbours.

Choosing between the city and countryside depends on a person's needs and preferences. Someone who enjoys an active lifestyle and easy access to services may prefer a city. On the other hand, someone who values peace, space, and nature may prefer the countryside. Neither lifestyle is suitable for everyone.

Comprehension — Compare & Contrast

1. How is the countryside different from the city?

- A. It usually has more public transportation.
- B. **It generally has fewer people and more open space.**
- C. It has more shops and entertainment.

2. What is one advantage of living in a city?

- A. **Important services are often nearby.**

- B. There is usually less traffic.
- C. People have more access to nature.

3. What do city and country life have in common?

- A. Both always have strong public transportation.
- B. Both have large populations.
- C. People in both places work, study, shop, and enjoy free time.

4. How may communities in cities and the countryside differ?

- A. City residents may meet a wider variety of people.
- B. People in the countryside never meet their neighbours.
- C. City communities are always closer.

5. Which statement best compares the two lifestyles?

- A. Country life is convenient because everything is nearby.
- B. City life offers convenience, while country life often offers more peace and space.
- C. City and country life provide exactly the same experience.

Word Bank: convenience • environment • transportation • peaceful • communities

1. Public _____ makes it easier to travel around a city. **(transportation)**
2. Living close to shops and services offers greater _____. **(convenience)**
3. The countryside often has a quieter and more _____ atmosphere. **(peaceful)**
4. Strong _____ can develop in both cities and rural areas. **(communities)**
5. The countryside usually offers a natural _____ with more open space. **(environment)**

1. usually have /to shops/ City residents/ and public services /easy access

City residents usually have easy access to shops and public services.

2. often provide / a more /Rural areas/ peaceful / atmosphere

Rural areas often provide a more peaceful atmosphere.

3. Public transportation /is generally /in large cities/ more available

Public transportation is generally more available in large cities.

4. and activities/usually offer /Cities /of entertainment /a wider variety

Cities usually offer a wider variety of entertainment and activities.

5. to live / a person's /The best place / depends on /lifestyle

The best place to live depends on a person's lifestyle.

Exercise 6 (Reading skill: Inference)

*For **Inference**, students should use clues in a text and what they already know to understand something the writer does not say directly.*

Why Do Some Cafés Want You to Stay?

When you enter a café, you may notice more than the smell of coffee. Some cafés have comfortable chairs, soft lighting, quiet music, and free Wi-Fi. These details are not always chosen by accident. Café owners often think carefully about how the space makes customers feel.

A comfortable environment may encourage people to stay longer. Someone might order a drink, sit down to study, and later decide to buy a snack or a second drink. Some cafés also provide large tables and electrical outlets, making it easier for customers to work or meet friends. The longer customers stay, the more opportunities there are for them to purchase something else.

However, not every café follows this approach. Some have smaller tables, brighter lights, or fewer comfortable seats. During busy hours, this can help customers finish their drinks and leave sooner, allowing new customers to find a seat. The design of a café can therefore influence how people behave without them noticing it.

The next time you visit a café, pay attention to its surroundings. The furniture, music, lighting, and even the distance between tables may have a purpose. A café is not only designed to look attractive; its environment can also support the way the business wants customers to use the space.

Comprehension — Making Inferences

1. Why might a café provide comfortable chairs and free Wi-Fi?

- A. **It may want customers to spend more time there.**
- B. It wants customers to leave quickly.
- C. It does not sell enough coffee.

2. What can we infer about a person who stays in a café for several hours?

- A. They are not allowed to order food.
- B. **They may buy more than one item during their visit.**
- C. They probably work at the café.

3. Why might a busy café use smaller tables and less comfortable seating?

- A. The owners dislike comfortable furniture.
- B. The café wants people to sleep there.
- C. **It may want seats to become available more quickly.**

4. What can we infer about café design from the passage?

- A. **Design can affect customer behavior.**
- B. Customers always notice how cafés influence them.
- C. All cafés use the same design strategy.

5. What does the passage suggest about business spaces in general?

- A. **Their design may be planned to encourage certain behaviors.**
- B. Their only purpose is to look attractive.
- C. Customers choose businesses only because of their furniture.

Fill in the Blanks

Word Bank: environment • influence • comfortable • customers • purchase

1. Soft lighting and music can create a relaxing _____. **(environment)**
2. Some cafés provide _____ chairs to encourage people to stay longer. **(comfortable)**
3. Café design can _____ the way people behave. **(influence)**
4. People who stay longer may decide to _____ another drink or snack. **(purchase)**
5. Smaller tables can help new _____ find a seat during busy hours. **(customers)**

1. to stay / Comfortable furniture / customers / can encourage / longer

Comfortable furniture can encourage customers to stay longer.

2. a more / Soft music / relaxing / can create / atmosphere

Soft music can create a more relaxing atmosphere.

3. can make /more active /Bright light /and energetic/ a space

Bright lighting can make a space feel more active and energetic.

4. their space /customer behavior/Business /to influence /often design

Businesses often design their spaces to influence customer behavior.

5. a powerful effect /our decisions / on / Small details / can have

Small details can have a powerful effect on our decisions.

Exercise 7 (Reading skill: Analyzing language)

*For **Analyzing Language**, students should understand how a writer's choice of words affects meaning and feelings.*

The Language of Advertising

Advertisements are everywhere. We see them on websites, social media, television, and even on the streets. Companies use advertisements to introduce their products, but they also carefully choose words that make those products sound attractive. Words such as “amazing,” “perfect,” and “new” can create a positive feeling, even when they do not give us much information about the product.

Advertisements also speak directly to customers. Phrases like “You deserve the best” or “Don’t miss your chance” can make a message feel personal and urgent. Some advertisements use words such as “limited” or “today only” to encourage people to make a quick decision. These expressions can create the feeling that customers may lose an opportunity if they wait too long.

Another common technique is using powerful words to describe simple features. A company might call a normal drink “refreshing and energizing” or describe a small improvement as a “revolutionary change.” These words can influence how customers imagine a product before they have even tried it.

Understanding advertising language can help people become more careful consumers. Instead of focusing only on exciting words, readers can ask what information an advertisement actually provides. By paying attention to word choice, we can better understand how language is used to influence our decisions.

Comprehension — Analyzing Language

1. Why does the writer put “amazing,” “perfect,” and “new” together?

A. **They are words commonly used to make products sound attractive.**

- B. They describe the price of a product.
- C. They give detailed information about products.

2. What feeling does the phrase “Don’t miss your chance” try to create?

- A. Confusion
- B. Urgency
- C. Relaxation

3. Why might an advertisement use the word “limited”?

- A. To encourage customers to make a decision quickly
- B. To explain how a product is made
- C. To show that the product is inexpensive

4. What does the word “revolutionary” suggest about a product?

- A. It is ordinary and familiar.
- B. It is old and unpopular.
- C. It is very new or different.

5. Why does the writer use the phrase “exciting words” in the final paragraph?

- A. To describe words designed to attract people's attention
- B. To show that advertisements are always entertaining
- C. To suggest that customers need more vocabulary

Word Bank: urgent • attractive • influence • limited • powerful

1. Advertisers use positive words to make their products sound more _____.
(attractive)
2. Words like “today only” can make a message feel _____. **(urgent)**
3. The word “_____” may encourage customers to buy something before it is gone. **(limited)**
4. Advertisements often use _____ words to describe simple products.
(powerful)
5. Carefully chosen language can _____ the decisions people make. **(influence)**

1. often use/ to attract/ Advertisements/ positive language/ customers

Advertisements often use positive language to attract customers.

2. an ordinary product/ Powerful words/ more special/ can make/seem

Powerful words can make an ordinary product seem more special.

3. carefully choose / their products / Companies / sound attractive / words to make

Companies carefully choose words to make their products sound attractive.

4. before trusting /Customers /carefully / should think /advertisements

Customers should think carefully before trusting advertisements.

5. make customers /Some advertisement / feel like / need to act quickly / they

Some advertisements make customers feel they need to act quickly.

Exercise 8 (Reading skill: Writer's purpose)

*For **Writer's Purpose**, students should be able to identify whether a writer wants to inform, explain, persuade, entertain, or warn.*

Why You Should Take Breaks While Studying

Many students believe that studying for several hours without stopping will help them learn more. However, working for too long can make it difficult to concentrate. After spending a long time on the same task, you may become tired, lose focus, and find it harder to remember information.

Taking short breaks can help your mind recover. You could stand up, stretch, drink some water, or walk around for a few minutes. When you return to your work, you may feel more refreshed and ready to concentrate again. A short break can also reduce the stress of studying for a long period.

However, a study break should not become a long distraction. Checking social media or watching videos can easily turn a five-minute break into thirty minutes. Setting a timer can help you control the length of your break and return to studying on time.

Studying effectively is not always about spending more hours at your desk. It is also about using your time wisely. Try including short breaks in your study routine and notice whether they help you stay focused and productive.

Comprehension — Writer's Purpose

1. What is the writer's main purpose?

- A. To persuade students to include short breaks when studying
- B. To entertain readers with a story about school
- C. To describe different school subjects

2. Why does the writer mention stretching, drinking water, and walking?

- A. To explain activities students can do during a short break
- B. To describe a daily exercise routine
- C. To show that studying is unhealthy

3. Why does the writer mention social media and videos?

- A. To recommend ways to relax after school
- B. To warn that short breaks can become long distractions
- C. To explain why students enjoy their phones

4. What does the writer want readers to understand from the final paragraph?

- A. Longer study sessions always produce better results.
- B. Students should avoid studying at home.
- C. Using study time effectively is more important than simply studying longer.

5. Which sentence best shows the writer trying to persuade the reader?

- A. "After spending a long time on the same task, you may become tired."
- B. "Try including short breaks in your study routine."
- C. "Setting a timer can help you control the length of your break."

Word Bank: concentrate • recover • distraction • refreshed • effectively

1. Taking a short break can help your mind _____ after studying for a long time. **(recover)**
2. Students may find it difficult to _____ when they become tired. **(concentrate)**
3. Social media can become a _____ during a study break. **(distraction)**
4. After resting for a few minutes, students may feel more _____. **(refreshed)**
5. Managing your time well can help you study more _____. **(effectively)**

1. can help / students / Taking / maintain their focus / regular break

Taking regular breaks can help students maintain their focus.

2. for too long / harder / Studying / may make it / information / to remember

Studying for too long may make it harder to remember information.

3. studying /Students /unnecessary distractions / should avoid /while

Students should avoid unnecessary distractions while studying.

4. should include /and recover / A good study routine /enough time / to rest

A good study routine should include enough time to rest and recover.

5. more effective / can make /studying / wisely / Managing your time

Managing your time wisely can make studying more effective.

Exercise 9 (Reading skill: Recognizing coherence)

*For **Recognizing Coherence**, students should understand how ideas and sentences connect logically.*

Why Teenagers Need Enough Sleep

Sleep is important for everyone, but it is especially important for teenagers. During the teenage years, the body and brain are still developing. Because of this, teenagers generally need more sleep than adults. Getting enough rest helps them stay alert and prepare for the next day.

However, many teenagers do not get enough sleep. Homework, social activities, and late-night screen time can keep them awake. In addition, teenagers may naturally feel sleepy later at night. As a result, waking up early for school can be difficult, and they may feel tired during the day.

A lack of sleep can affect both learning and mood. Tired students may have difficulty concentrating in class or remembering new information. In addition, they may become more easily annoyed or stressed. These effects can make everyday activities more challenging.

Developing a regular sleep routine can help. For example, teenagers can try going to bed at a similar time each night and avoiding screens shortly before bed. Therefore, making sleep a priority can help teenagers feel more prepared for school and daily activities.

Comprehension — Recognizing Coherence

1. Which sentence best follows this idea?

Teenagers need enough sleep because their bodies and brains are still developing.

- A. Many adults drink coffee in the morning.
- B. **Getting enough rest can help them stay alert during the day.**
- C. Teenagers have many different hobbies.

2. Which sentence does NOT belong in a paragraph about the effects of poor sleep?

- A. Tired students may struggle to concentrate in class.
- B. Lack of sleep can make people feel stressed or annoyed.
- C. **Many schools offer different sports after class.**

3. Among these 3 sentences, which sentence should come first?

- A. As a result, he struggled to stay awake during class.
- B. **Tom stayed up very late finishing his homework.**
- C. He found it difficult to concentrate on the lesson.

4. Which sentence best connects these two ideas?

Many teenagers use their phones before bed. _____ They may find it harder to fall asleep.

- A. However, smartphones are available in many different models.
- B. For example, some students prefer studying in the morning.
- C. **As a result, they may stay awake longer than planned.**

5. Which sentence would best end a paragraph about improving sleep habits?

- A. **Developing healthy sleep habits can help teenagers feel more prepared each day.**
- B. Teenagers enjoy many different activities after school.
- C. Some people prefer sleeping with two pillows.

Word Bank: developing · concentrate · routine · alert · importance

- 1. Teenagers' bodies and brains are still _____ during these years. **(developing)**
- 2. Getting enough sleep can help students stay _____ during the day. **(alert)**
- 3. Tired students may find it difficult to _____ in class. **(concentrate)**
- 4. Going to bed at a similar time can create a healthy sleep _____. **(routine)**
- 5. Teenagers should understand the of _____ getting enough sleep. **(importance)**

1. at school / can improve /Getting enough sleep / concentration / your

Getting enough sleep can improve your concentration at school.

2. the next day / exhausted /Staying up late / can make / you feel

Staying up late can make you feel exhausted the next day.

3. can affect /A lack of / your mood / rest /and energy

A lack of rest can affect your mood and energy.

4. can improve /daily performance /Healthy sleep habits/ your

Healthy sleep habits can improve your daily performance.

Exercise 10 (Reading skill: Drawing conclusion)

*For **Drawing Conclusions**, students should be able to combine several details from the text to understand something that is not directly stated.*

The Hidden Cost of Fast Fashion

Fashion trends can change very quickly. Many clothing companies produce large amounts of inexpensive clothes so customers can regularly buy new styles. This is known as fast fashion. It allows people to follow new trends without spending too much money, but these low prices can come with other costs.

Producing clothes requires water, energy, and raw materials. For example, cotton needs large amounts of water to grow, while making synthetic fabrics requires energy and chemicals. When companies produce millions of new items every year, they use a large amount of these resources. Transporting clothes around the world also requires fuel.

Another problem happens after people buy the clothes. Because fast-fashion items are inexpensive, some people wear them only a few times before buying something new. Unwanted clothes may be thrown away, creating more waste. Although some clothes can be donated or recycled, not everything can be reused.

Consumers can make different choices. They can buy fewer items, choose clothes that last longer, repair damaged clothes, or buy second-hand products. These actions may seem small, but when many people change their habits, they can reduce waste and the demand for new clothing.

Comprehension — Drawing Conclusions

1. What can we conclude about inexpensive clothing?

- A. **A low price does not mean there are no environmental costs.**
- B. Cheap clothes always last longer.
- C. Inexpensive clothes require fewer resources.

2. What conclusion can be drawn about frequently changing fashion trends?

- A. **They may encourage people to buy clothes more often.**
- B. They make clothes more expensive to produce.
- C. They help people keep clothes longer.

3. Based on the passage, what can we conclude about throwing clothes away?

- A. It is the best way to recycle clothing.
- B. **It can increase the amount of waste.**
- C. It reduces the production of new clothes.

4. What can we conclude about buying clothes that last longer?

- A. **It may reduce the need to buy new clothes frequently.**
- B. It makes fashion trends change faster.
- C. It increases the amount of clothing waste.

5. What overall conclusion can be drawn from the passage?
